

Dining under the microscope

Siobhan Vinish (VP Corporate Communications and Public Affairs, Manitoba Hydro), Dr. Michael Czubryt (St. Boniface Hospital Albrechtsen Research Centre), Kelvin Shepherd (CEO of Manitoba Hydro), Chuck LaFlèche (President and CEO of St. Boniface Hospital Foundation.)

Friends of the St. Boniface Hospital Foundation had a fabulous time at “Dining Under the Microscope”, an interactive experience hosted by Youth BIOLab Jeunesse at the St. Boniface Hospital Albrechtsen Research Centre.

The hand-on experience provided by Steve Jones, Director of the Youth BIOLab, had donors re-living their days in science class surrounded by beakers and microscopes. Every guest had the opportunity to learn more about heart health, look at live heart cells and take a closer look at the inner workings of a pig’s heart! The Youth BIOLab provides hands-on science experiences for Grades 4-12 students. This school year, more than 4,000 students will have experienced science in a whole new way at the RBC Youth BIOLab Jeunesse.
