

The Process

Students who wish to apply must submit an extended abstract by August 31, 2010. Students chosen for poster or oral presentations will be notified by September 30, 2010.

Applications may be found at http://umanitoba.ca/faculties/science/student_resources/833.htm

Submissions

Applications can be emailed to information.ugconference@sbrc.ca in either pdf or Microsoft Word 2003 formats.

The Challenge

The mandate of the conference is to create an environment which will introduce undergraduate students to formal scientific presentation and the larger scientific community in Manitoba.

The conference will be composed of poster and oral presentations by undergraduate students, and a series of keynote speeches from basic and clinical scientists focusing on cardiovascular disease.

Background

The Undergraduate Life Sciences Research Conference will be the first of its kind in Canada. Currently, many research conferences focus on established researchers and graduate students. On the journey towards a successful academic career, oral and written communication skills are crucial. As many undergraduate students involved in research will go on to professional studies, the conference will focus on the early development of writing and presentation skills. Participation is encouraged for any undergraduate student working under a principle investigator performing research in life sciences.

Organizers

Mr. Matthew Lytwyn

Chairman, ULSRC
Research Associate/Graphic Design Artist/
Undergraduate Student

Mr. David Blackwood

Vice-Chairman, ULSRC
Research Assistant/Undergraduate
Student

Ms. Leah Peters, B.Sc

Treasurer, ULSRC
Masters Student/Medical Student

Target Audience

The conference will be open to first through fourth year undergraduate students, honors students and recent graduates (graduated in 2010). The undergraduate student must be involved in life science-based research. With the permission of his or her supervisor, each student will present their work and demonstrate its relationship to the larger research project they are involved in.
