

Czubryt on CJOB

Tune in to Winnipeg's 680 CJOB from 11 a.m. to noon on Sunday, January 27, to find out what it's all about...

[Dr. Michael Czubryt](#), Principal Investigator, Molecular Pathophysiology, Institute of Cardiovascular Sciences will be in studio to talk about the research he's conducting on finding a treatment and cure for cardiac fibrosis – a condition that could lead to heart failure.
